**№03-24-31 от 16.04.2024**

## **Acknowledge**

We, as a result of this, confirm that Yangi Kon Ltd. awarded Pre Stack Solutions-Geo two contracts on 16.06.2023 to execute the project within eight months named "**2D, 3D Seismic Survey and Well Logging Data Reprocessing and Comprehensive Interpretation for Ustyurt Deep gas project**" based on a tender competition. The data covers approximately 3500 sq. km, and the project's total value is \$1,146,739.75.

The tender call took place in May 2023, and companies worldwide were invited to participate. Bidders were evaluated based on technical proposals, time schedules, and pricing. Pre Stack Solutions-Geo's technical proposal included proprietary technologies and received high scores.

Several institutions followed up on the project: Boston Consulting Group, Government institution IGIRNIGIM and Uzbekgeofizika.

The project was executed according to the contract and delivered on time. Core results of the project:

- Perspective areas for the discovery of hydrocarbon deposits have been identified.
- 16 wells have been identified at the sites.

The work was completed according with highest international standards within planned time frame. We admit exceptional quality of deliverables provided by PSS Geo and their flexible approach in solving non-standard tasks. We highly recommend PSS Geo as a partner and will seek for opportunities to work with them again.

**Sincerely,**

**Nodir Mukhutdinov**  
**Project Leader**
